PROBLEMS

01

Taxi drivers, bus drivers and truck drivers who travel a long distances gets drowsy which leads to accidents.

02

The feature that alerts the drivers from getting drowsy is available only in certain cars

03

This feature is already exists but it can be used in that particular cars like Audi, Mercedes and volvo by the steering wheel angle, lane deviation, etc.

SOLUTIONS

01

It alerts the drivers
from drowziness
by giving a beep
sound

02

This app can be used by
all the users

03

Now this app will be
available world wide for
all the users and
everyone can make use
of it

Business Model:

Designed by team Tiny Techies

Key Activities

- Helps user to stay alert while driving
- Prevents accidents

Key Partners

Every people across the globe

Feasibility and scalability

Technical and commercial

Cost Structure

Considering the lives of people, we have planned to ship this app free of cost

Key resources and channels

Mobile app / website

Focus groups and end users

Users all across the globe

thank
you
